📇 PROFILE

With three years of professional experience as a web developer, I've tackled a variety of real-world challenges across several projects. Holding a first-class honours degree in Computer Science in addition to a years worth of full stack development training before my current role as a Full Stack Developer, I bring a strong problem-solving approach to development. Driven by a passion for creating impactful software solutions, I thrive in collaborative environments and am eager to embrace new challenges. I am seeking a role where I can expand my skillset, contribute to cutting-edge projects, and drive innovation.

💼 PROFESSIONAL EXPERIENCE

Gira
Junior Full Stack Developer
02/2022 – present | Düsseldorf, Germany
- Play a key role in end-to-end software lifecycle management for Smart Home Services on Gira's digital platform.
- Develop and deploy features using GitLab, CI/CD, Svelte, TypeScript, and Python.
- Implement robust quality assurance practices, ensuring exceptional stability and reliability.
- Collaborate with cross-functional teams to optimize development processes and integrate new features.
- Perform code reviews, write technical documentation, and contribute to continuous improvement initiatives.

Content Guru
Technical Support Engineer
04/2021 – 11/2021 | Bracknell, England
- Managed end-to-end resolution of incidents, service requests, and queries.
- Prioritized and categorized faults to ensure efficient resource allocation and minimize disruption.
- Cultivated strong customer relationships through proactive communication.

Tughans
IT Assistant
07/2018 – 08/2019 | Belfast, Northern Ireland
- Developed comprehensive IT documentation for firm-wide systems and software.
- Provided first-line IT support, managing requests through the in-house service desk system.
- Created support documents, including training manuals and help sheets.

🗎 CERTIFICATES

- Microsoft 98-383: Introduction to Programming Using HTML and CSS ⤴

🗁 PROJECTS

Company Directory

A more rigorous reply to this specification was required as a user requirements document was needed to be prepared which, when signed off, triggers the release of SQL allowing development of a "mobile-first" application to maintain a company personnel database (MySQL). Sign off is only achieved upon the student supplying an independently witnessed document providing confirmation of the system's ability to perform error-free.

Gazetteer

The task was to reply to a website specification for a map-based app to provide information on countries – with a focus on a "mobile-first" development. Preferably using a framework, to then develop HTML, CSS and JavaScript with JQuery modules that use PHP server-based components to source data from third-party APIs (GeoNames, OpenWeather). The solution is assessed on its delivery to specification, functionality, and usability.
